SUMMARY

Software developer with experience across manufacturing operations, data analysis, and business-focused web systems. During my Summer Camp Internship at Jabil, I support Test Engineering through dashboards, databases, and software solutions. I have also led web relaunches, internal systems, and KPI-driven platforms for real business use cases.

SKILLS

Technical: Python, PHP, SQL/MySQL, HTML, CSS, JavaScript, Node.js, Angular (TypeScript), Dart/Flutter, Power BI, Power Query, MongoDB Atlas, Cybersecurity, Network Installation.

Professional: Data Analysis, Dashboard Development, Project Management, Problem-Solving, Analytical Thinking, Team Leadership, Client Collaboration, High-impact presentations (Speak Up).

WORK EXPERIENCE

Summer Camp Intern - Test Engineering

Jabil | Guadalajara, Mexico | Jun 2026 - Aug 2026

- Analyze manufacturing test data and support operational decision-making through dashboards and structured reporting.
- Build and maintain Power BI dashboards, databases, and software tools for the Test Engineering area.

Software Developer & Pharmaceutical Chemist

DermaSun | Zapopan, Mexico | 2020 - Present | <https://www.dermasun.net>

- Developed and relaunched the company's e-commerce website, driving a 200% increase in online sales.
- Led internal digital and operational initiatives spanning web systems, process improvement, and infrastructure support.

Freelance Web Developer

Natural-hair.mx | Zapopan, Mexico | 2025

- Architected and developed a dynamic full-stack catalog website for a beauty industry client.
- Implemented a product catalog, location finder, Q&A section, and custom SQL-backed features.

HIGHLIGHTED PROJECTS

app.dermasun.net - Business management system for dermasun.net.

Centralizes internal processes and supports day-to-day business operations.

OZCTECH.net / ozctech.com.mx - Personal website and professional digital presence.

Presents services, projects, and contact channels as the base of my professional online identity.

DeployTrack.store - ITIL service management system with KPI dashboard.

Provides visibility into service workflows, incidents, and operational KPIs.

Milaquiniela.site - Node.js web app for the FIFA World Cup 2026 quiniela.

Manages participants, match tracking, and pool administration for tournament operations.

EDUCATION

Bachelor of Engineering in Software Development, CETI Colomos	2023 - 2027
Technologist in Pharmaceutical Chemistry, CETI Colomos	2019 - 2022
