SUMMARY

Software developer with experience across manufacturing operations, data analysis, and business-focused web systems. Currently a Software Engineer Intern at Jabil, developing and maintaining applications, databases, reporting tools, and process automation for Test Engineering. Also experienced in e-commerce relauches, internal business systems, and KPI-driven platforms built for real operational needs.

SKILLS

Technical: Python, PHP, SQL/MySQL, HTML, CSS, JavaScript, Node.js, Angular (TypeScript), Dart/Flutter, Power BI, Power Query, MongoDB Atlas, ISO 27001, Network Security and Configuration.

Professional: Data Analysis, Dashboard Development, Agile, Kanban, Project Management, Problem-Solving, Analytical Thinking, Team Leadership, Client Collaboration, Stakeholder Communication and Technical Presentations.

WORK EXPERIENCE

Software Engineer Intern - Test Engineering

Jabil | Zapopan, Mexico | Jun 2026 - Present

- Promoted from Software Summer Intern after receiving a seven-month internship extension.
- Develop and maintain applications from requirements gathering through feature implementation and defect resolution, including databases, reporting, documentation, and process automation.

Software Developer & Operations

DermaSun | Zapopan, Mexico | Feb 2020 - Present | <https://www.dermasun.net>

- Led the company's e-commerce relaunch, followed by a company-reported 200% increase in online sales.
- Lead internal business systems, process improvement, and security infrastructure initiatives.

Freelance Web Developer

Natural-hair.mx | Zapopan, Mexico | 2025

- Architected and developed a dynamic full-stack catalog website for a beauty industry client.
- Implemented a product catalog, location finder, Q&A section, and custom SQL-backed features.

HIGHLIGHTED PROJECTS

dermasun.net Landing Page & E-commerce Relaunch - Responsive product and brand experience.

Includes a category catalog, product pages, SPF quiz, and quote/contact flow; followed by a company-reported 200% increase in online sales.

LiTRACK - Mobile-first personal KPI web app.

Turns time, sleep, traffic, focus, activities, appointments, ideas, and goals into daily and weekly insights using PHP, MySQL, and JavaScript.

app.dermasun.net - Internal business management system.

Centralizes operational workflows, information tracking, and day-to-day process management.

DeployTrack.store - ITIL service management system with KPI dashboard.

Unifies incident, service, and KPI tracking in a structured operational workflow.
